

MiHRAB — Phase 4 Real-Device Test Checklist

Separate automated tests from real-device validation.

Automated: flutter test (155 passed, 20 skipped, 0 failed)

This document: manual validation on physical hardware / emulator.

A. Launch & Onboarding Flow

#	Check	Pass	Notes
A1	Fresh install → onboarding appears	☐	
A2	Complete onboarding → Home screen appears (no GPS re-request)	☐	
A3	Correct saved location city shown in header	☐	
A4	Correct country shown	☐	

B. Date Display

#	Check	Pass	Notes
B1	Gregorian date matches selected-location date (not device timezone)	☐	e.g. device=London 00:30, location=Tokyo: should show Tokyo's date
B2	Turkish locale: Gregorian month name in Turkish	☐	
B3	English locale: Gregorian month name in English	☐	
B4	Arabic locale: Gregorian date in Arabic numerals / right format	☐	
B5	Hijri date visible with disclaimer label	☐	
B6	Hijri date plausible (± 1 day of local authority)	☐	

C. Prayer Times

#	Check	Pass	Notes
C1	Six prayer times shown: Fajr, Sunrise, Dhuhr, Asr, Maghrib, Isha	☐	
C2	Times match expected values for selected city	☐	Cross-check with diy-anet.gov.tr or similar
C3	Sunrise visually distinct from obligatory prayers	☐	Italic / secondary colour / note label
C4	Current/next prayer is visually highlighted	☐	

D. Countdown

#	Check	Pass	Notes
D1	Countdown ticks visibly every second	☐	
D2	Countdown shows correct prayer name	☐	
D3	Between Fajr and Dhuhr: "Next" shows Dhuhr (not Sunrise)	☐	
D4	After Isha: "Next" shows Fajr, time is tomorrow's Fajr	☐	
D5	Countdown never goes negative	☐	

E. Background / Foreground Lifecycle

#	Check	Pass	Notes
E1	Background app for 5 min → resume: count-down continues correctly (no drift)	☐	
E2	Background before a prayer → resume after that prayer: next prayer updated	☐	
E3	Background before midnight → resume after midnight: tomorrow's times loaded	☐	
E4	Background across Isha → resume: shows Fajr as next (tomorrow)	☐	

F. Theme

#	Check	Pass	Notes
F1	Light theme: readable, no contrast issues	☐	
F2	Dark theme: readable, no contrast issues	☐	
F3	System theme: follows OS setting in real time	☐	

G. Localization

#	Check	Pass	Notes
G1	Turkish (tr): all strings in Turkish	☐	
G2	English (en): all strings in English	☐	
G3	Arabic (ar): all strings in Arabic	☐	
G4	Arabic: layout is RTL (text right-aligned, layout mirrored)	☐	
G5	Arabic: Hijri month names render correctly in Arabic script	☐	
G6	Switch locale at runtime → Home updates without restart	☐	

H. Accessibility

#	Check	Pass	Notes
H1	Large font (Accessibility → Font size 130–200%): city name not clipped	☐	
H2	TalkBack (Android) / VoiceOver (iOS): countdown announced on change	☐	<code>liveRegion: true</code>
H3	TalkBack: prayer names readable	☐	

I. Location Change

#	Check	Pass	Notes
I1	Manually change location from Settings → Home refreshes without restart	☐	
I2	New city name shown immediately	☐	
I3	New prayer times calculated for new city	☐	
I4	Countdown restarts for new next prayer	☐	

J. Missing Location / Error States

#	Check	Pass	Notes
J1	Clear app data → fresh launch → no crash	☐	
J2	Missing location state shown with localized message	☐	
J3	“Set Location” button navigates to location setup	☐	
J4	Failure state (force timezone failure) shows retry button	☐	
J5	Retry button triggers reload without restart	☐	

K. Offline

#	Check	Pass	Notes
K1	Airplane mode after first successful launch → prayer times still shown	☐	
K2	Countdown still works offline	☐	
K3	First-ever launch in airplane mode → graceful failure state (not crash)	☐	

L. Device-Specific

#	Check	Pass	Notes
L1	Device timezone ≠ selected location timezone: Home uses selected location date	☐	e.g. device in UTC+0, selected city Istanbul UTC+3
L2	Physical device API 21+ (Android 5.0)	☐	Min SDK
L3	Notch / punch-hole screens: header not obscured	☐	
L4	Tablet layout: prayer list not excessively stretched	☐	

Result Summary

Category	Checks	Passed	Failed	Blocked
A. Launch	4			
B. Date	6			
C. Prayer times	4			
D. Countdown	5			
E. Lifecycle	4			
F. Theme	3			
G. Localization	6			
H. Accessibility	3			
I. Location change	4			
J. Missing/error	5			
K. Offline	3			
L. Device	4			
Total	51
